NEMA 1 Spare Fuse Cabinet

Application

EPI NEMA Type 1 Spare Fuse Cabinets are used in general purpose indoor areas to store spare fuses.

Construction

Made from 16-gauge steel. The covers have continuous stainless steel hinges and are held closed by a flush cylinder lock. Each lock comes with two identical keys. Cabinets come equipped with one or two shelves as required. Available in Aluminum and Stainless Steel.

Finish

The standard finish is a Sherwin Williams ANSI-70 light-dove gray painted enamel finish inside and out.

Industry Standard

Meets National Electrical Manufacturers Association (NEMA) standard for Type 1 (General Purpose) enclosure.
