NEMA 1 Telephone Cabinet

Application

EPI NEMA Type 1 Telephone Cabinets are used for control cabinets and instrument cases in areas which do not require protection from rain, snow, or sleet. Typically used indoors only.

Construction

Cabinets are flush or surface mounted. Fronts are made from 14-gauge steel. Covers have continuous piano hinges and are held closed by a flush paddle latch. Bodies are made from 16, or 14-gauge steel. TC Fronts are available for purchase separately. Available in Aluminum and Stainless Steel.

Accessories

Optional key-locking cylinder lock and hasp for padlocking. Interior panels: wood or steel.

Finish

Only the TC Fronts are painted with a Sherwin Williams ANSI-70 light-dove gray painted enamel. Note: Bodies are standard galvanized finish.

Industry Standard

These telephone cabinets conform to the National Electrical Manufacturers Association (NEMA) standard for Type 1 (General Purpose) enclosures.
