NEMA 12 Galvanize Screw Cover Wireway

Application

EPI NEMA Type 12 JIC Galvanize Screw Cover Wireway are designed to protect wiring from dust, dirt, oil, and moisture laden environments. For indoor use.

Construction

Made from 16 or 14 gauge galvanized steel. All seams are continuously welded and there are no holes or knockouts. The covers are attached with stainless steel self-captivating screws. Covers are gasketed with a neoprene gasket attached with an oil-resistant adhesive (Covers not to exceed 72"). External feet can be provided for mounting.

Finish

The standard finish is G-90, Galvanized steel. A Sherwin Williams ANSI-70 Light-dove gray enamel finish inside and out is also available.

Industry Standard

Meets National Electrical Manufacturers Association (NEMA) standard for Type 12 (Industrial Use) and Type 13 (Oil tight and dust tight) enclosures. Also conforms to the Joint Industrial Council (JIC) standard EGP-1-1967.
