NEMA 3R Hinge Cover Wireway

Application

EPI NEMA 3R Hinge Cover Wireway are used to protect wiring in outdoor installations. Designed to protect enclosed equipment against falling rain and sleet; may also be used indoors where dripping water is a problem.

Construction

Made from 16 or 14-gauge steel. A drip shield top and smooth seam-free sides, front and back prevents rain, snow, or sleet from entering the enclosure. The cover has a continuous stainless steel hinge on the bottom side and is securely fastened with screws along the opposite side. No gasket is provided. Knockouts are not available. Panels must be ordered separately. Available in Aluminum and Stainless Steel.

Finish

The standard finish is G90 galvanized steel. A Sherwin Williams ANSI-70 painted gray enamel finish inside and out is also available.

Industry Standard

Meets National Electrical Manufacturers Association (NEMA) standard for Type 3R (Rainproof and Sleet-Ice Resistant) enclosures.
